

Tips for Using Your Mastermoney Card

- Memorize your PIN
- Don't write your PIN down. If a thief gets your PIN, they will be able to withdraw money from your account at ATM machines.
- Protect your account when you make online purchases by registering your card with MasterCard Secure Code. Just click this link from our web site:

- Keep a record of all MasterMoney transactions so you know how much is in your account. Simply save your receipts so you can enter them in your check-book register later.
- Most merchants have Point-of-Sale (POS) terminals where you may pay for your purchases with your MasterMoney card. If you are at a POS terminal you have the choice between "credit" or "debit" options.
- By selecting "credit" you will be asked to sign a receipt. Selecting "debit" you will be asked to enter your PIN.
- "Credit" transactions are the least costly for the credit union to process so we encourage our members to use this option.
- "Debit" or PIN transactions allow you to get cash back.
- Both transaction types are automatically deducted from your checking account.
- You can use the MasterMoney card as an ATM card to withdraw cash from ATM machines.
- Surcharging may occur at some machines. To save money, look for surcharge-free ATM machines displaying these logos:
